

R38 Basic Controller

General Information

The R38 Basic PID Set-point Controller is used in the Apex Ovens together with a thermocouple sensor.

Standard Features

- A simple easy to use controller that is fitted to the Apex ovens
- Providing accurate PID (proportional integral derivative) control
- Panel mounted device with a clear red LED display

Options (specify these at time of order)

- Optional over-temperature protection is available by the addition of an additional through the panel temperature control instrument
- Optional hydraulic thermostat for low cost over-temperature protection

Technical Specifications

R38 Controller

Control technology	Digital PID
Display H x W (mm)	Red LED numerical 20 x 50
Configuration	Panel mounted
Dimensions H x W (mm)	35 x 78
